## 1. General Information

### Datasheet Revision History

Datasheet Release: **2024-09-10**

Datasheet for the CFAH2002A1-YYH-JT character LCD display module.

### Product Change Notifications

You can check for or subscribe to [Part Change Notices](#) for this display module on our website.

### Variations

Slight variations between lots are normal (e.g., contrast, color, or intensity).

### Volatility

This display module has volatile memory.

### Disclaimer

Certain applications using CrystalFontz America, Inc. products may involve potential risks of death, personal injury, or severe property or environmental damage ("Critical Applications"). CRYSTALFONTZ AMERICA, INC. PRODUCTS ARE NOT DESIGNED, INTENDED, AUTHORIZED, OR WARRANTED TO BE SUITABLE FOR USE IN LIFE-SUPPORT APPLICATIONS, DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS. Inclusion of CrystalFontz America, Inc. products in such applications is understood to be fully at the risk of the customer. In order to minimize risks associated with customer applications, adequate design and operating safeguards should be provided by the customer to minimize inherent or procedural hazard. Please contact us if you have any questions concerning potential risk applications.

CrystalFontz America, Inc. assumes no liability for applications assistance, customer product design, software performance, or infringements of patents or services described herein. Nor does CrystalFontz America, Inc. warrant or represent that any license, either express or implied, is granted under any patent right, copyright, or other intellectual property right of CrystalFontz America, Inc. covering or relating to any combination, machine, or process in which our products or services might be or are used.

All specifications in datasheets on our website are, to the best of our knowledge, accurate but not guaranteed. Corrections to specifications are made as any inaccuracies are discovered.

## 2. Module Description

This is a 20 character by 2-line LCD display module with a yellow-green LED backlight. This display has a built-in Sitronix ST7066U controller. The Sitronix ST7066U is compatible with the industry standard Hitachi HD44780 controller.

Please see [Sitronix ST7066U LCD Controller Datasheet](#) for further reference.

## 3. Features

- Built-in Controller: ST7066U (or equivalent)
- STN, Positive, Yellow-green, Transflective Mode
- +5v Power Supply
- Viewing Direction: 6 o'clock
- 1/16 Duty
- Temperature Operation: -20°C to +70°C
- Interface: 6800

## 4. Mechanical Data

Item	Specification (mm)	Specification (inch, reference)
Overall Width and Height	116.0 (W) x 37.0 (H) x 13.9 (D)	4.567 (W) x 1.457 (H) x 0.547 (D)
Viewing Area	85.0 (W) x 18.6 (H)	3.346 (W) x 0.732 (H)
Active Area	73.5 (W) x 11.5 (H)	2.893 (W) x 0.453 (H)
Character Size	3.20 (W) x 5.55 (H)	0.126 (W) x 0.219 (H)
Character Pitch	3.70 (W) x 5.95 (H)	0.146 (W) x 0.234 (H)
Dot Size	0.60 (W) x 0.65 (H)	0.024 (W) x 0.026 (H)
Dot Pitch	0.65 (W) x 0.70 (H)	0.026 (W) x 0.028 (H)
Weight (Typical)	53 grams	1.9 ounces

### 5. Mechanical Drawing

Pin	Function
1	GND
2	VDD
3	VO
4	RS
5	RW
6	E
7-14	DB0-DB7
15	A
16	K

Display Controller	ST7066U
Viewing Direction	6:00
Operating Temperature	-20 - 70°C
Voltage Levels	5v logic

Units: millimeters  
Tolerance: ±0.3mm

 <b>Crystalfontz</b> © 2024 Crystalfontz America, Inc.	Part Number: <b>CFAH2002A1</b>	Date: 9/4/2024	Filename: CFAH2002A1.pdf	Revision: 1.0
		Web: www.crystalfontz.com/CFAH2002A1		Sheet: 1 of 1

## 6. Interface Pin Function

Pin No.	Symbol	Level	Function
1	V <sub>SS</sub>	0v	Ground
2	V <sub>DD</sub>	5.0v	Supply Voltage for Logic
3	V <sub>O</sub>	(variable)	Supply Voltage for LCD
4	RS	H/L	H: Data L: Instruction Code
5	R/W	H/L	H: Read L: Write
6	E	H, H → L	Chip Enable Signal
7	DB0	H/L	Data Bus Line
8	DB1	H/L	Data Bus Line
9	DB2	H/L	Data Bus Line
10	DB3	H/L	Data Bus Line
11	DB4	H/L	Data Bus Line
12	DB5	H/L	Data Bus Line
13	DB6	H/L	Data Bus Line
14	DB7	H/L	Data Bus Line
15	A	-	Power Supply for B/L (+)
16	K	-	Power Supply for B/L (-)

## 7. System Block Diagram

## 8. $V_O$ Connection for Display Contrast

Crystalfontz recommends allowing field adjustment of  $V_O$  for all designs. The optimal value of  $V_O$  varies with temperature, variations in  $V_{DD}$ , and viewing angle.  $V_O$  will also vary module-to-module and batch-to-batch due to normal manufacturing variations. If exposing adjustments to  $V_O$  is not possible, Crystalfontz recommends enabling adjustment of  $V_O$  as part of a product's final test.

Although a potentiometer is shown as a typical connection,  $V_O$  can be driven by a microcontroller, using either a DAC or a filtered PWM. Displays that require  $V_O$  to be negative may require a level shifting circuit.

Start with an initial value of  $V_O = +0.65\text{v}$  ( $V_{LCD} = +4.35\text{v}$ ), and adjust from there.

## 9. Absolute Maximum Ratings

Parameter	Symbol	Min	Typ	Max	Unit	Notes
Supply Voltage for Logic	$V_{DD} - V_{SS}$	-0.3	-	7	V	(1)(2)
Supply Voltage for LCD	$V_{DD} - V_O$	-0.3	-	13	V	(1)(2)
Input Voltage	$V_i$	$V_{SS}$	-	$V_{DD}$	V	-
Operating Temperature	$T_{OP}$	-20	-	+70	$^{\circ}\text{C}$	-
Storage Temperature	$T_{ST}$	-30	-	+80	$^{\circ}\text{C}$	-

Notes:

- (1) These are stress ratings only. Extended exposure to the absolute maximum ratings listed above may affect device reliability or cause permanent damage.
- (2) Functional operation should be restricted to the limits in the Electrical Characteristics table below.

## 10. Electrical Characteristics

Item	Symbol	Condition	Min	Typ	Max	Unit
Supply Voltage for Logic	$V_{DD} - V_{SS}$	-	4.5	5.0	5.5	V
Supply Voltage for LCD	$V_{DD} - V_O$	$T_a = 20^{\circ}\text{C}$	-	-	5.7	V
		$T_a = 25^{\circ}\text{C}$	4.2	4.35	4.5	V
		$T_a = 70^{\circ}\text{C}$	3.8	-	-	V
High-level Input	$V_{IH}$	-	$0.7 \times V_{DD}$	-	$V_{DD}$	V
Low-level Input	$V_{IL}$	-	$V_{SS}$	-	0.6	V
High-level Output	$V_{OH}$	-	3.9	-	$V_{DD}$	V
Low-level Output	$V_{OL}$	-	0	-	0.4	V
Supply Current	$I_{DD}$	$V_{DD} = 5.0\text{V}$	1.0	1.2	1.5	mA

## 11. Optical Characteristics

Item	Symbol	Condition	Min	Typ	Max	Unit
View Angle	$\theta$	CR $\geq$ 2	0	-	20	$\phi = 180^\circ$
	$\theta$	CR $\geq$ 2	0	-	40	$\phi = 0^\circ$
	$\theta$	CR $\geq$ 2	0	-	30	$\phi = 90^\circ$
	$\theta$	CR $\geq$ 2	0	-	30	$\phi = 270^\circ$
Contrast Ratio	CR	-	-	3	-	-
Response Time	T rise	-	-	150	200	ms
	T fall	-	-	150	200	ms

## 12. Backlight Information

Parameter	Symbol	Condition	Min	Typ	Max	Unit	Notes
Supply Current	I <sub>LED</sub>	V=4.2v	168	210	252	mA	(1)(2)
Supply Voltage	V	-	4.0	4.2	4.4	V	-
Reverse Voltage	V <sub>R</sub>	-	-	-	8	V	-
Luminance (without LCD)	I <sub>v</sub>	I <sub>LED</sub> = 210mA	210	260	-	cd/m <sup>2</sup>	-
Wave Length	$\lambda$ p	I <sub>LED</sub> = 210mA	568	570	574	nm	-
LED Lifetime	-	I <sub>LED</sub> $\leq$ 210mA 25°C, 50-60% RH	-	100K	-	Hrs	(1)(2)
Color	Yellow-green						

**Notes:**

- (1) Supply current minimum value is only for reference since the LED brightness efficiency keeps enhancing. Current consumption becomes less and less to achieve the same luminance.
- (2) Lifetime is defined as the amount of time when the luminance has decayed to <50% of the initial value (100K hours is an estimate for reference only).

## 13. CGROM and DDRAM Tables

Please see [Sitronix ST7066U LCD Controller Datasheet](#) for further reference.

### 13.1. Display Position DDRAM Address

The following table shows the relationship between the controller's addresses and the corresponding character location on the module.

	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
DDRAM Address	00	01	02	03	04	05	06	07	08	09	0A	0B	0C	0D	0E	0F	10	11	12	13
DDRAM Address	40	41	42	43	44	45	46	47	48	49	4A	4B	4C	4D	4E	4F	50	51	52	53

### 13.2. Character Generator ROM (CGROM)

Upper 4 bit Lower 4 bit	LLLL	LLLH	LLHL	LLHH	LHLL	LHLH	LHHL	LHHH	HLLL	HLLH	HLHL	HLHH	HHLL	HHLH	HHHL	HHHH
LLLL	CG RAM (1)															
LLLH	(2)															
LLHL	(3)															
LLHH	(4)															
LHLL	(5)															
LHLH	(6)															
LHHL	(7)															
LHHH	(8)															
HLLL	(1)															
HLLH	(2)															
HLHL	(3)															
HLHH	(4)															
HHLL	(5)															
HHLH	(6)															
HHHL	(7)															
HHHH	(8)															

## 14. LCD Module Precautions

These precautions help ensure personal safety, module performance, and compliance of environmental regulations when using an LCD module.

### 14.1. Modules

- Avoid excessive physical and electrical shocks to module.
- Do not drop, bend, or twist the LCD display module.
- Do not make extra holes, modify the shape, or change the components of the printed circuit board.
- Do not disassemble the LCD display module.
- Do not operate the LCD display module outside the absolute maximum rating.
- Only solder to the I/O terminals.
- Store in an anti-static electricity container and clean environment.
- Do not display static information for long periods of time to avoid burn in.
- Crystalfontz has the right to change passive components on the display module. Resistors, capacitors and other passive components may have different appearance and color.
- Crystalfontz has the right to change the PCB revision/version in order to satisfy the supply stability, management optimization, the best product performance, etc., under the premise of not affecting the electrical characteristics and external dimensions.

### 14.2. Handling Precautions

- The display panel is made of glass. Do not apply mechanical impacts, stress or pressure to the LCD display module.
- Pressure applied to or near the display surface may damage the cell structure.
- If the display panel is accidentally broken and the internal organic substance leaks out, do not inhale or touch the organic substance.
- The polarizer covering the surface of the LCD display module is soft and can be easily scratched. Cover the polarizer in the final design.
- Clean the surface of the polarizer using Scotch Mending Tape No. 810 or an equivalent
  - Never breathe on the surface or wipe the surface using a cloth containing solvent such as ethyl alcohol, as the surface of the polarizer will become cloudy.
  - Water, ketone, and aromatic solvents may ruin the polarizer.
- Do not over bend the film with electrode pattern layouts. This can effect the display performance.

- Do not apply stress to the LSI chips and the surrounding molded sections.
- Do not apply input signals while the logic power is off.
- Prevent damage by electrostatic discharge (ESD) when handling the LCD display module:
  - Ground personnel handling LCD display modules.
  - Ground tools used for assembly such as soldering irons.
  - To suppress generation of ESD, avoid carrying out assembly work under dry environments.
  - Remove the protective film applied to the display panel slowly as ESD may be generated when removing the film.
- Protective film is applied to the surface of the display panel. Remove the film before assembly. If the LCD display module has been stored for a long period of time, residue adhesive material of the protection film may remain on the surface of the display panel after the film has been removed. In such a case, remove the residue material as discussed above.

### 14.3. Storing Precautions

- Store the LCD display modules in ESD preventative bags. Avoid exposure to direct sunlight and fluorescent lamps. Avoid high temperature and high humidity environments and low temperature (less than 0°C) environments. We recommend storing these modules in the packaged state in which they were shipped from Crystalfontz.
- Do not let water drops or dew adhere to the packages or bags.
- If electric current is applied when water is on the surface of the LCD display module, the module may become dewed. If a dewed LCD display module is placed under high humidity environments the electrodes may become corroded.

### 14.4. Designing Precautions

- The absolute maximum ratings cannot be exceeded for LCD display module. If these values are exceeded, panel damage may happen.
- Satisfy the VIL and VIH specifications and, ensure the signal line cable is as short as possible to avoid signal noise.
- Install excess current preventative unit (fuses, etc.) to the power circuit. Recommend value: 0.5A
- Avoid occurrence of mutual noise interference with the neighboring devices.
- When fastening the LCD display module, fasten the external plastic housing section. If the power supply to the LCD display module is forcibly shut down, by such errors as taking out the main battery while the LCD display panel is in operation, we cannot guarantee the quality of this LCD display module.
- Connection (contact) to any other potential than the above may lead to rupture of the IC.

### 14.5. Disposing Precautions

- Request qualified companies handle the industrial waste when disposing of the LCD display modules. Observe all relevant laws and regulations.

### 14.6. Other Precautions

- When an LCD display module is operated for a long period of time with a fixed pattern, the fixed pattern may remain as an after image or a slight contrast deviation may occur.
  - If the operation is interrupted and left unused for a while, normal state can be restored.
  - This will not cause a problem in the reliability of the module.
- To protect the LCD display module from performance drops by static electricity rapture, etc., do not touch the following sections whenever possible while handling the LCD display modules.
  - Pins and electrodes
  - Pattern layouts such as the TCP & FPC
- With this LCD display module, the LCD driver is exposed. If this LCD driver is exposed to light, malfunctioning may occur. Design the product and installation method so that the LCD driver may be shielded from light in actual usage and during the inspection processes.
- Although this LCD display module stores the operation state data by the commands and the indication data, when excessive external noise, etc. enters into the module, the internal status may be changed. Therefore, it is necessary to take appropriate measures to suppress noise generation or to protect from influences of noise on the system design.
- Periodically refresh the operation statuses in the software (reset the commands and retransfer the display data), to cope with catastrophic noise.
- Resistors, capacitors, and other passive components will have different appearance and color caused by the different supplier.
- Crystalfontz has the right to upgrade and modify the product function.
